

Check spelling Command: Click Text-> Click Check Spelling (OR Shift+F7)

Create Cleaner Code: Click Command -> Click clean UP HTML (Dreamweaver displays the name of the command based on the document type.)

Link Checker: Open page -> Click File -> Click Check Page -> Click check Links

Check Links Sitewide: Click Site -> *Click Check Links Sitewide* -> (Dreamweaver checks all the links in your site and displays broken ones in the result panel.)

Click here and select Orphaned files (Dreamweaver displays files that have no other file linked to them)

Click on orphaned files that you want to delete -> press delete key

Email Links: Click the cursor at the place on the page where you want to add the e-mail link -> Click Inset -> Click Email link

Manually to add email link: Select the text -> type the address in the link text box
<mailto:youremail@gmail.com>

Note: Email links only work if visitors have an e-mail program available on their computers.
