

Insert Rollover with Flash Text

You can create Flash text in Dreamweaver. Flash you can use to create a vector-based graphics, (**Vector graphics** is the use of geometrical primitives such as points, lines, curves, and shapes or polygon(s), which are all based upon mathematical equations, to represent images in computer graphics) as opposed to JPG and GIF which are based on pixels.

Vector-based graphics have a smoother look, smaller in size than pixel graphics and download quickly.

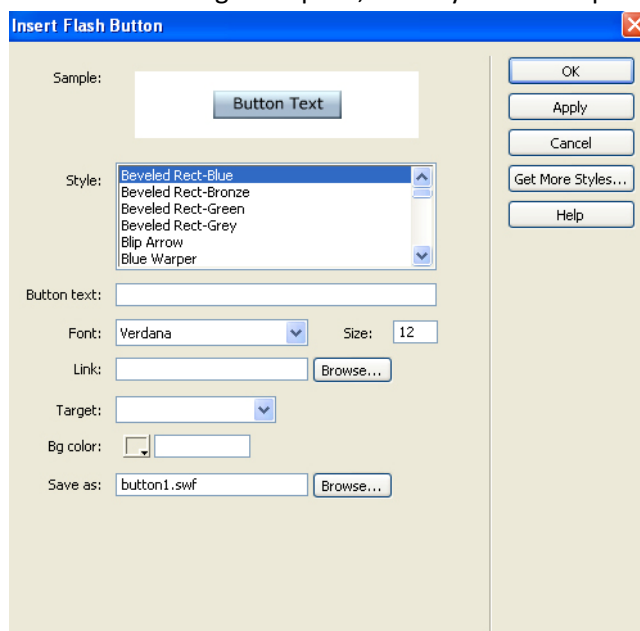

Inserting Flash text

1. Insert Bar -> click the Media list arrow, click Flash Text.
2. Insert Flash Text dialog box opens, which you use to specify the text settings for the Flash Text.

Inserting Flash Buttons

1. Insert Bar -> click the Media list arrow, click Flash Button.
2. Insert Flash Text dialog box opens, which you use to specify the settings for the Flash

Button.

Flash Paper

While Adobe's PDF file format has essentially become the de-facto standard for distributing documents on the web, introduced an innovative technique for distributing the same type of files, all based on a pre-existing technology that most computers already have the necessary plug-ins for.
