Course Description
Nursing of the adult patient with common recurring health alterations includes advanced nursing interventions based on physiological and psychological needs of adult patients. This course builds on concepts of commonly recurring health alterations presented in Nursing the Ill Adult I (NUR 2100). The physiological and psychological needs of the adult patient are addressed through Quality and Safety for Nurses (QSEN) Initiative incorporating the concepts of patient centered care, teamwork and collaboration, evidence-based practice, safety, quality improvement and informatics; the Nursing Process; and the Categories of Client Needs. The principles of priority setting, leadership and delegation are incorporated throughout the course.

Class work for typical week consists of: six (6) hours of classroom instruction, three (3) hours of college laboratory/simulation, and eight (8) hours of health agency experiences. Laboratory sessions are on campus and in hospitals or other health agencies. It is essential for students to engage in additional practice for further development of skills. Provisions are available for additional time in the college laboratory for practice.

STUDENT LEARNING OUTCOMES (SLOs)
Upon completion of NUR 2200, using the Nursing Process in a variety of health care settings to a diverse population of adult patients, the student will:

Course SLOs

1. Assume safe nursing practices while providing care.
3. Employ evidence-based practice while delivering nursing care.
4. Implement critical thinking modalities while providing care.
5. Interact collaboratively with members of the healthcare team.
6. Assume a leadership role when providing care.
7. Demonstrate competency when using technology in the provision of care.
8. Apply understanding of ethical and legal principles related to the practice of nursing.
ASSESSMENT MEASURES for COURSE SLOs
Students will perform satisfactorily in the classroom, laboratory/simulation and clinical setting as evidenced by achieving 75% or greater on written exam, various course specific written assignments, and demonstration of satisfactory performance on course specific clinical competency and evaluation tools.

ASSESSMENT TECHNOLOGY INSTITUTE (ATI) TESTING
Kingsborough’s Nursing Department uses ATI Nursing Education tutorials, testing and remediation each semester. Active participation in ATI assignments and testing is a requirement of this course and will account for 10% of the course grade. Failure to take the proctored exam as scheduled will result in a grade of incomplete and will prevent progression in the program.

ATTENDANCE
Complete participation in class is possible only when students are able to focus attention on the class, therefore entering class after it has begun is disrespectful to Faculty and classmates. Talking out of turn or exhibiting other disruptive behaviors is not tolerated and students will be asked to leave the classroom or lab.

All cell phones, smart devices or other multimedia devices that generate sound must be turned off when any member of the academic community enters a classroom. Cellular devices are allowed to be on in the classroom only if the owner is using the caller ID, voice messages or a vibrating battery. NO TEXTING IS ALLOWED AT ANY TIME DURING CLASS AND/OR LABS. Members of the academic community must exit the classroom to make or receive calls.

A student is deemed excessively absent in any course when he or she has been absent 15% of the number of contact hours a class meets during a semester. When a student is excessively absent, a grade of "WU" will be assigned as described in the college catalogue. Attendance at pre and post conference for laboratory experience is required. Absence from either pre or post conference constitutes an absence for the day’s experience.

STUDENTS WITH DISABILITIES
Access-Ability Services (AAS) serves as a liaison and resource to the KCC community regarding disability issues, promotes equal access to all KCC programs and activities, and makes every reasonable effort to provide appropriate accommodations and assistance to students with disabilities. Your instructor will make the accommodations you need once you provide documentation from the Access-Ability office (D-205). Please contact AAS for assistance.

EXAM POLICY
All personal items (backpacks, purses, etc.) must be placed in front of the classroom before the exam begins. The Nursing Department will provide each student with a calculator and #2 pencil during exams. There are to be NO personal items in use (pens, highlighters, pencils, electronic devices, etc.) during an exam. Food and drink is strictly prohibited during the examination period. Students will be asked to remove all hats, scarfs and jewelry prior to the beginning of exams. (The only exceptions are head coverings and jewelry worn for religious purposes). There will be no individual exam reviews with faculty members and there will be no group exam review at the end of the exam.

EVALUATION
Grades will be calculated according to college and departmental policy as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>97 – 100</td>
</tr>
<tr>
<td>A</td>
<td>93 – 96</td>
</tr>
<tr>
<td>A-</td>
<td>90 – 92</td>
</tr>
<tr>
<td>B+</td>
<td>87 – 89</td>
</tr>
<tr>
<td>B</td>
<td>83 – 86</td>
</tr>
<tr>
<td>B-</td>
<td>80 – 82</td>
</tr>
<tr>
<td>C+</td>
<td>78 – 79</td>
</tr>
<tr>
<td>C</td>
<td>75 – 77</td>
</tr>
<tr>
<td>C-</td>
<td>70 – 74</td>
</tr>
<tr>
<td>D+</td>
<td>66 – 69</td>
</tr>
<tr>
<td>D</td>
<td>60 – 65</td>
</tr>
<tr>
<td>F</td>
<td>&lt; 60</td>
</tr>
<tr>
<td>W</td>
<td>Withdrew without penalty</td>
</tr>
</tbody>
</table>

(11/17/2011, Rev. 3/06/12, 8/21/13, 2/12/2014, 7/29/2014, 9/15/14, 1/6/15, 7/5/15, 2/2/18, 6/29/18, 3/1/19, 6/25/20, 2/26/22, 8/6/22)
WU  Unofficial withdrawal (counts as failure)
INC  Doing passing work, but missing an assignment or an examination; changes to a “FIN” if work is not made up by the 10th week of the next 12-week session
FIN  Failure as a result of an Incomplete

**Nursing 2200** grades will be calculated as follows:

- Lecture examinations average (2 exams) 63%
- Final examination 35%
- ATI assignments and testing 2%
- Clinical competency
  - Unfolding Nursing Care Plans Satisfactory or Unsatisfactory
  - Writing assignment Satisfactory or Unsatisfactory
  - Case Study Satisfactory or Unsatisfactory

Students are expected to take all tests when scheduled. Exceptions to this rule will be for emergency situations and the faculty must know in advance. Students who do not take a test on the scheduled date are required to take a makeup test. All makeup tests may be given at the end of the semester. Students who fail to take the scheduled exams or makeup exams will receive a grade of zero for that test.

All written assignments must comply with college standards for written work. Written assignments are to be turned in during the class period on the date that they are due. All assignments must be handed in by the end of the course to complete the requirements of the course. A late assignment will meet the requirements of the course but will not receive full credit. If written assignments are not submitted by the end of the course, the student will receive a grade of "INC" for the course. Students must submit all assignments prior to the beginning of the next semester in order to progress in the program.

Clinical agency performance will be evaluated as Satisfactory (S) or Unsatisfactory (U). Performance that has been designated as "U" at the end of the course will result in failure of the course. A minimum average grade of "75%" is required on all clinical assignments to achieve a satisfactory clinical grade.

A conference with the instructor is required at mid-semester, and at the end of the course, at which time the student's progress in the course will be discussed. In addition, students may initiate conferences with the instructor at other times.

**RETENTION CRITERIA**
Criteria for retention in the Nursing Program mandates that students;

1. Earn a minimum of a “C” grade in every required Nursing and co-requisite course inclusive of BIO 1200, BIO 5100, ENG 2400, and PSY 3200.
2. **Students who achieve a “C-“ grade in required clinical nursing course may apply to repeat the course one time only in the semester immediately following, subject to space availability.** The minimum grade for clinical courses that are repeated is a “B.” The “Intent to Return to Nursing Course” form can be found on the KCC Website Nursing Department page under “Forms”. This must be completed and include a plan of success that demonstrates significant changes in how they will approach the course when repeated. Only one required nursing course may be repeated. A grade of less than a “C” in a second nursing course will cause the student to be dismissed from the program.
3. Students must achieve a grade of “B” in order to pass NUR 1700. Students in NUR 1700 who achieve a failing grade of no less than “C-“may repeat the course one time only after submitting an “Intent to Return Form.”
4. Students who enter Nursing 1700 and Nursing 1800 MUST complete the Nursing Program within four years from the date of entry into this course. Any student who has not attended nursing courses for two or more consecutive semesters cannot be readmitted into the Nursing Program unless qualifying examinations have been passed in the required nursing courses previously successfully completed. Qualifying examinations may be repeated only once.

(11/17/2011, Rev. 3/06/12, 8/21/13, 2/12/2014, 7/29/2014, 9/15/14, 1/6/15, 7/5/15, 2/2/18, 6/29/18, 3/1/19, 6/25/20,2/26/22, 8/6/22)
5. Students in the clinical component can only appeal the retention criteria one time.
6. Students in the clinical component can only withdraw once and must be passing to do so.

**Topical Outline**

*Each unit incorporates the Categories of Client Needs: Safe and Effective Care Environment (Management of Care, Safety and Infection Control), Health Promotion and Maintenance, Psychosocial Integrity, Physiological Integrity (Basic Care and Comfort, Pharmacological and Parenteral Therapies, Reduction of Risk Potential, Physiological Adaptation.)*

- Unit 1 – Assessment & Management of the Patient who has an Oncological Disorder
- Unit 2 – Assessment & Management of the Patient who has a Hematologic Cancer
- Unit 3A – Assessment & Management of the Patient who has a Head & Neck / Lung Cancer
- Unit 3B – Assessment & Management of the Patient who has a Gastrointestinal Cancer
- Unit 3C – Assessment & Management of the Patient who has a Reproductive Cancer
- Unit 3D – Care of the Patient who has Skin Cancer
- Unit 3E – Care of the Patient who has Skin Cancer
- Unit 4A – Assessment & Management of the Patient who has an Acute Neurological Disorder
- Unit 4B – Assessment & Management of the Patient who has a Chronic Neurological Disorder
- Unit 5 – Assessment & Management of the Patient who has a Spinal Cord Injury / Connective Tissue Disorder / Rehabilitative Disorder
- Unit 6 – Assessment & Management of the Patient who has – Assessment & Management of the Patient who has a Sensory Perceptual Disorder

**Unit 1 – Care of the Patient who has an Oncological Disorder**

**Content/Lecture Discussion**

- The structure and function of the immune system
  - Role of the immune system, cell cycle review, abnormal cellular growth, classifications of tumors
- Strategies to involve the adult patient and family in reaching successful outcomes
  - Health teaching related to cancer prevention, care, oncological emergencies and end of life care
- Strategies for identifying and managing care
  - Coordination of care utilizing leadership, delegation, and priority setting
  - Team functioning on safety & quality of care
- Strategies relevant to the outcomes of care
  - Provision of cancer care with sensitivity and respect specific to the adult patient with cancer
    - Combination chemotherapy
    - Radiation therapy
    - Surgery
    - Bone marrow and stem cell transplant
### Unit 1 – Care of the Patient who has an Oncological Disorder

- Biological response modifiers
- Pain management

Application of critical thinking processes when practicing safely in the delivery of care
  - Use of the nursing process throughout the mutually designed plan of care

Utilization of technology
  - Communication and documentation of care rendered via electronic medical record
  - Uses hand held computer devices for health teaching
  - Uses the EMR to communicate and document care, and impart for medication reconciliation

### Unit 2 – Care of the Patient with a Hematological Cancer

**Content/Lecture Discussion**

The structure and function of the Hematological system

Types of cancers
  - Acute/chronic myelogeneous
  - Lymphocytic leukemia
  - Hodgkin/ Non-Hodgkin’s lymphoma
  - Multiple myeloma

Strategies to involve the adult patient and family in reaching successful
  - Health teaching regarding hematological cancer prevention and care.

Strategies for identifying and managing
Unit 1 – Care of the Patient who has an Oncological Disorder

- Coordination of care in meeting related needs for the adult patient with a hematological cancer
- Team functioning on safety & quality of care

Strategies relevant to the outcomes of care
- Provision of cancer care with sensitivity and respect specific to the adult patient with a hematological cancer including
  - Combination chemo and radiation therapies
  - Bone marrow and stem cell transplant
  - Pain management
- Application of critical thinking processes when practicing safely in the delivery of care
  - Use of the nursing process throughout the mutually designed plan of care

Utilization of technology
- Communication and documentation of care rendered via electronic medical record
- Uses hand held computer devices for health teaching
- Uses the EMR to communicate and document care, and impart for medication reconciliation

### Unit 4A – Care of the Patient who has an Acute Neurological Disorder

#### Content/Lecture Discussion

The structure and function of the Neurological System:
- Review the Neurological System

Strategies to involve the adult patient and family in reaching successful outcomes for the patient with an acute neurological disorder
- Neuro Overview / Assessment
- Head trauma
- Increased ICP
- Subdural & intracerebral hematomas
- Cerebral herniation
- CVA
- Brain tumors
- Supratentorial & infratentorial mass lesions
- Infection
- Meningitis

Health teaching related to the prevention, immediate treatment, management of emergencies, management of sensory – motor deficits, and end of life care (brain death)

Strategies for identifying and managing care utilizing a team approach
- Coordination of care utilizing leadership, delegation, and priority setting
- Team functioning on safety & quality of care

Strategies relevant to the outcomes of care
- Provision of care with sensitivity and respect specific to the adult patient with an acute neurological disorder
  - Emergency care
  - Medications
  - Surgery
    - Burr holes
    - Craniotomy
  - Ongoing neuro monitoring
  - Respiratory interventions
## Unit 4A – Care of the Patient who has an Acute Neurological Disorder

- Chemo and radiation therapies
- BRMs
- Pain management

Application of critical thinking processes when practicing safely in the delivery of care
- Use of the nursing process throughout the mutually designed plan of care

Utilization of technology
- Communication and documentation of care rendered via electronic medical record
- Uses hand held computer devices for health teaching.
- Uses the EMR to communicate and document care, and impart for medication reconciliation

## Related Learner Experiences

### Required Reading

*Hinkle & Cheever:* Ch. 6 pp. 1966-1991; Ch. 61 pp.1992 – 2015, Ch. 63 pp. 2058 – 2069, Ch. 63 pp. 2055 – 2057, Ch. 64 pp. 2088 – 2090, Ch. 65 pp. 2113-2121

### Computer Assisted Instruction & A/V materials

Access using the Class Code at Lippincott CoursePoint+ for Hinkle: Brunner & Suddarth’s Textbook of Medical-Surgical Nursing, Fifteenth Edition.

**Prep-U Mastery Level Quiz**

Ch. 60 Assessment of Neurologic Function
Ch. 61: Management of Patients with Neurologic Dysfunction
Ch. 63: Management of Patients with Neurologic Trauma (Prep-U Mastery Level Quiz)
Ch. 64: Management of Patients with Neurologic Infections, Autoimmune Disorders and Neuropathies

**Picmonic:**

- Cranial Nerve Function
- Glasgow Coma Scale
- Level of Consciousness: Descriptive guide for Glasgow Coma Scale
- Increased Intracranial Pressure (ICP) Assessment
- Neurovascular Assessment 6 P’s

**Video:**

- Watch and Learn: Assessing the Cranial Nerves
- Watch and Learn: Assessing the Musculoskeletal and Neurological System
- Watch and Learn: Caring for a Patient Who Has Had a Cerebrovascular Accident

**Animation:**

- Concepts in Action: Stroke

**Interactive Case Study**

- Practice and Learn: Hemorrhagic Stroke
- Practice and Learn: Ischemic Stroke

ATI Targeted Medical-Surgical 2019: Neurosensory and Musculoskeletal

### Case Study

**Lab/Simulation Experience**

Cerebrovascular Accident: Treatment, stabilization, and rehabilitation
- Head Trauma Model with Increased ICP
- Interprofessional CVA simulation

### Clinical Experiences

- Neuro Assessment
- Glasgow Coma Scale
- Cushing’s Triad
### Unit 4B – Care of the Patient who has a Chronic Neurological Disorder

#### Content/Lecture Discussion

Review of the structure and function of the Neurological System continued

Strategies to involve the adult patient and family in reaching successful outcomes for the patient with a chronic neurological disorder

- Headache (migraine)
- Seizure disorder
- Parkinson disease (PD)
- Multiple Sclerosis (MS)
- Myasthenia Gravis (MG)
- Guillain-Barre Syndrome (GBS)
- Amyotrophic Lateral Sclerosis (ALS)

Health teaching related to the prevention, immediate treatment and management of emergencies, management of sensory-motor deficits, and end of life care (brain death)

Strategies for identifying and managing care

- Coordination of care utilizing leadership, delegation, and priority setting in meeting the patient’s needs
- Team functioning on safety and quality of care

Strategies relevant to the outcomes of care

- Provision of care with sensitivity and respect specific to the adult patient with a chronic neurological disorder
  - Emergency care
  - Medications
  - Surgery
    - Deep brain stimulation
    - Vagal nerve stimulation
  - Ongoing neuro monitoring
  - Respiratory interventions
  - Biofeedback
  - PT/OT
  - Pain management, PT/OT.

Application of critical thinking processes when practicing safely in the delivery of care

- Use of the nursing process throughout the mutually designed plan of care

Utilization of technology

- Uses the EMR to communicate and document care, and impart for medication reconciliation
- Uses hand held computer devices for health teaching

### Required Reading

*Hinkle & Cheever*: Ch. 61 pp. 2017 – 2030; Ch. 64 pp. 2094 – 2109; Ch. 65 pp. 2122 – 2126, 2131 – 2132

Computer Assisted Instruction & A/V materials

Access using the Class Code at Lippincott CoursePoint+ for *Hinkle: Brunner & Suddarth’s Textbook of Medical-Surgical Nursing, Fifteenth Edition.*

*Picmonic:*

- Guillain-Barre Syndrome Assessment
- Parkinson’s Disease Assessment
- Parkinson’s Drugs
- Seizure Precautions

ATI Practice Assessment RN Medical-Surgical Online Practice 2019 B
### Unit 4B – Care of the Patient who has a Chronic Neurological Disorder

### Unit 5 – Care of the Patient who has a Spinal Cord Injury / Connective tissue Disorder/Rehabilitation

**Content/Lecture Discussion**

Review of the structure and function of the spinal column and musculoskeletal system

Strategies to involve the adult patient and family in reaching successful outcomes for the patient with a spinal cord injury/joint disease/rehab

- Spinal cord injury
- Degenerative Joint Disease (DJD)
- Total Knee Arthroplasty (TKA)
- Arthritis:
  - Osteoarthritis (OA)
  - Inflammatory arthritis:
    - Rheumatoid Arthritis (RA)
    - Gouty Arthritis
  - Systemic Lupus Erythematosus (SLE)

Health teaching related to the prevention, immediate treatment, management of emergencies, management of sensory-motor deficits for patients with a spinal cord injury, joint or rehabilitative disease

Strategies for identifying and managing care

- Coordination of care utilizing leadership, delegation, and priority setting in meeting the rehabilitative related needs for the adult patient
- Team functioning on safety and quality of care when meeting the needs of the adult patient with a spinal cord injury/joint disease/rehab.

Strategies relevant to the outcomes of care

- Provision of care with sensitivity and respect specific to the adult patient with a spinal cord injury/joint disease/rehab including
  - Emergency care
    - Ventilation
    - Intubation
  - Spinal shock
  - Neurogenic shock
  - Autonomic dysreflexia
  - Cervical tongs
- Medication
- Surgery
  - Halo traction
- Ongoing neuro monitoring
- Respiratory interventions
- Pain management
- Referral/community resources.

Application of critical thinking processes when practicing safely in the delivery of care

- Use of the nursing process throughout the mutually designed plan of care

Utilization of technology in the care

- Uses the EMR to communicate, document care, and impart for medication reconciliation.
- Uses hand held computer devices for health teaching.

### Required Reading

*Hinkle & Cheever: Ch. 34 pp. 1078 – 1084; Ch. 36 pp. 1122 – 1125; Ch. 63 pp. 2070 – 2087*

### Case Study

**Laboratory/Simulation Experiences**

- Traumatic Spinal Cord Injury: Cervical collar, neuro and cardiac assessment, logrolling, spinal shock

**Computer Assisted Instruction & A/V materials**

*Access using the Class Code at Lippincott CoursePoint+ for Hinkle: Brunner & Suddarth’s Textbook of Medical-Surgical Nursing, Fifteenth Edition.*

Unit 4B – Care of the Patient who has a Chronic Neurological Disorder

Interactive Case Study:
Practice and Learn: Acute Spinal Cord Injury
Practice and Learn: Osteoarthritis
Practice and Learn: Systemic Lupus Erythematosus
Picmonic:
Rheumatoid Arthritis Interventions

Chapter 34: Assessment and Management of Patients with Rheumatic Disorders
  o Rheumatoid Arthritis
  o Systemic lupus erythematosus
Chapter 63: Management of Patients with Neurologic Trauma
  o Acute Spinal Cord Injury

Unit 6 – Care of the Patient with a Sensory Perceptual Disorder

Content/Lecture Discussion

The structure and function of the sensory system
  o Review of the ear
Strategies to involve the adult patient and family in reaching successful outcomes for the patient with a sensory perceptual disorder
  o Otitis Externa
  o Meniere’s disease

Health teaching related to the prevention, immediate treatment, management of emergencies and management of sensory-motor deficits for patients with a sensory perceptual disorder
Strategies for identifying and managing care utilizing a team approach
  o Coordination of care utilizing leadership, delegation, and priority setting
  o Team functioning on safety and quality of care
Strategies relevant to the outcomes of care for the adult patient with a sensory perceptual disorder:
  o Provision of care with sensitivity and respect specific to the adult patient with a sensory perceptual disorder include
    ▪ Emergency care
    ▪ Medications
    ▪ Surgery
      ▪ Meniere’s disease: endolymphatic shunt
      ▪ Ongoing sensory monitoring
    ▪ Pain management
    ▪ Referral and communities resources.
Application of critical thinking processes when practicing safely in the delivery of care
  o Use of the nursing process throughout the mutually designed plan of care
Utilization of technology
  o Uses the EMR to communicate and document care, and impart for medication reconciliation
  o Uses hand held computer devices for health teaching
