

# CUNY Common Core Course Submission Form

Instructions: All courses submitted for the Common Core must be liberal arts courses. Courses may be submitted for only one area of the Common Core. All courses must be 3 credits/3 hours unless the college is seeking a waiver for a 4-credit Math or Science course (after having secured approval for sufficient 3-credit/3-hour Math and Science courses). All standard governance procedures for course approval remain in place.

| Syllabus  | Syllabus must be included with submission, 5 pages max  |
| <p style="text-align: center;"><b>Waivers for 4-credit Math and Science Courses</b></p> <p style="text-align: center;">All Common Core courses must be 3 credits and 3 hours.</p> <p>Waivers for 4-credit courses will only be accepted in the required areas of Mathematical and Quantitative Reasoning and Life and Physical Sciences. Such waivers will only be approved after a sufficient number of 3-credit/3-hour math and science courses are approved for these areas.</p> |   |
| If you would like to request a waiver please check here:  | <input type="checkbox"/> Waiver requested   |
| If waiver requested:<br>Please provide a brief explanation for why the course will be 4 credits.  |   |
| If waiver requested:<br>Please indicate whether this course will satisfy a major requirement, and if so, which major requirement(s) the course will fulfill.  |   |

**CUNY COMMON CORE Location**

Please check below the area of the Common Core for which the course is being submitted. (Select only one.)

**Required**

- ☐ English Composition  
☐ Mathematical and Quantitative Reasoning  
☐ Life and Physical Sciences

**Flexible**

- ☐ World Cultures and Global Issues   ☐ Individual and Society  
☐ US Experience in its Diversity   ☒ Scientific World  
☐ Creative Expression

**Learning Outcomes**

In the left column explain the assignments and course attributes that will address the learning outcomes in the right column.

**I. Required Core (12 credits)**

**A. English Composition: Six credits**

A course in this area must meet all the learning outcomes in the right column. A student will:

- Read and listen critically and analytically, including identifying an argument's major assumptions and assertions and evaluating its supporting evidence.
- Write clearly and coherently in varied, academic formats (such as formal essays, research papers, and reports) using standard English and appropriate technology to critique and improve one's own and others' texts.
- Demonstrate research skills using appropriate technology, including gathering, evaluating, and synthesizing primary and secondary sources.
- Support a thesis with well-reasoned arguments, and communicate persuasively across a variety of contexts, purposes, audiences, and media.
- Formulate original ideas and relate them to the ideas of others by employing the conventions of ethical attribution and citation.

**B. Mathematical and Quantitative Reasoning: Three credits**

A course in this area must meet all the learning outcomes in the right column. A student will:

- Interpret and draw appropriate inferences from quantitative representations, such as formulas, graphs, or tables.
- Use algebraic, numerical, graphical, or statistical methods to draw accurate conclusions and solve mathematical problems.
- Represent quantitative problems expressed in natural language in a suitable mathematical format.
- Effectively communicate quantitative analysis or solutions to mathematical problems in written or oral form.
- Evaluate solutions to problems for reasonableness using a variety of means, including informed estimation.
- Apply mathematical methods to problems in other fields of study.

|  | <ul style="list-style-type: none"> <li>● Identify and engage with local, national, or global trends or ideologies, and analyze their impact on individual or collective decision-making.</li> </ul>   |
| <b>E. Scientific World</b><br>A Flexible Core course <u>must meet the three learning outcomes</u> in the right column.   |   |
| Students read various accounts of major battles from the point of view of both sides in the conflict and from differing levels of command.   | <ul style="list-style-type: none"> <li>● Gather, interpret, and assess information from a variety of sources and points of view.</li> </ul>   |
| Students are challenged to see why battles developed as they did and offer alternative strategies for potentially differing outcomes.  | <ul style="list-style-type: none"> <li>● Evaluate evidence and arguments critically or analytically.</li> </ul>   |
| Both of the above are accomplished through written homework assignments and a research paper.  | <ul style="list-style-type: none"> <li>● Produce well-reasoned written or oral arguments using evidence to support conclusions.</li> </ul>  |
| A course in this area (II.E) <u>must meet at least three of the additional learning outcomes</u> in the right column. A student will:  |   |
| The interplay of technological and tactical developments in each era exemplify the way war influences science and, at the same time, is influenced by science.   | <ul style="list-style-type: none"> <li>● Identify and apply the fundamental concepts and methods of a discipline or interdisciplinary field exploring the scientific world, including, but not limited to: computer science, history of science, life and physical sciences, linguistics, logic, mathematics, psychology, statistics, and technology-related studies.</li> </ul>                              |
| Students use maps and battle accounts to assess the impact of geography and weather on warfare.  | <ul style="list-style-type: none"> <li>● Demonstrate how tools of science, mathematics, technology, or formal analysis can be used to analyze problems and develop solutions.</li> </ul>  |
|  | <ul style="list-style-type: none"> <li>● Articulate and evaluate the empirical evidence supporting a scientific or formal theory.</li> </ul>  |
| Warfare is viewed within the general scientific and technological context of each specific era. The impact of technological change on warfare is emphasized through the study of weapons, communications, and transportation technologies. | <ul style="list-style-type: none"> <li>● Articulate and evaluate the impact of technologies and scientific discoveries on the contemporary world, such as issues of personal privacy, security, or ethical responsibilities.</li> </ul>   |
| Students are exposed to different levels of command structure and how war effects public policy, technological change, and socio-economic structure.   | <ul style="list-style-type: none"> <li>● Understand the scientific principles underlying matters of policy or public concern in which science plays a role.</li> </ul>  |
