To: $\quad$ Members of the College Council
Date: May 13, 2019
From: Michael Sokolow, Secretary
Subject: Agenda for the Meetings of May 23, 2019
The College Council will meet on Thu. May 23, 2019 in the MAC Playhouse at 3:00 PM.

## AGENDA

I. Approval of the minutes of the meeting held on April 4, 2019
II. Reports

## A. President's Report

## B. Provost's Report

1. Presentation of the Revised Guidelines for Tenure and Promotion, approved by the College P\&B Committee in November 2018. [ATTACHMENT A]
2. Creation of a new Academic Department of Allied Health, Mental Health and Human Services

## C. Students Committee Report

A representative from the Student Government Association will report on the progress and activities of the SGA since the Council approved its new Constitution in Spring 2018.
D. Curriculum Committee Report [Changes in Degree p.1-25; New Courses p.2527; Pathways Approval p.27; Gen Ed Learning Outcomes p.27; Informational items p.28-43; Agenda resumes p.43]

The Curriculum Committee presents the following resolutions for approval. (The section numbering reflects those used by CUNY).

## CHANGE IN DEGREE REQUIREMENT

## Department of Biology

1. A.S. Biology

HEGIS: 5604.00

## NEW COURSES

## Department of Behavioral Sciences

## 1. PSY 4100, The Psychology of Immigration

Prerequisite: PSY 1100
Corequisite: None
Pre/Co-requisite: None
Credits: 3
Equated Credits: N/A
Hours: 3
Course Description: This course examines the psychological impact of immigration and how immigrants navigate in American society. This course will provide students with a brief overview of our postcolonial history, cultural genocide in residential schools, the problem with the Model Minority Myth, developmental problems in satellite babies, stigma of mental illness among immigrant communities, the role of culture and food, living as migrant workers, the meaning of citizenship, feeling sage in an age of xenophobia, and the importance of immigrants supporting Black Lives Matter movement. Students who take this class will have a better understanding of the role of immigration and the lived experiences of immigrants, become more civically engaged in their communities, and be more culturally competent

## Department of Mathematics and Computer Science

1. MAT 8AO Math for Everyday

Prerequisite: For students who are eligible for a corequisite course per CUNY Math placement guidelines and likely to benefit from some developmental support, eligibility determined as follows (1) Score 40-56 on Elementary Algebra portion of the ACCUPLACER CUNY Assessment Test in Math, or (2) passed MAT M100, or (3) passed a Kingsborough workshop culminating in passing the Departmental MAT M100 final exam, or (4) Appropriate corequisite designation.

Corequisite: None
Pre/Co-requisite: None
Credits: 3 plus
Equated Credits: 4 equated credits
Hours: 7

Course Description: This course is designed to provide non-STEM students with critical-thinking and mathematical skills useful in making informed decisions on many aspects of modern life involving quantitative concepts. This course provides the qualitative reasoning skills for informed citizens to understand the world around them and to make choices affecting their lives. Topics include basic probability and risk assessment, financial math, data analysis, solution of elementary algebraic equations, modeling from data in perspective, mathematics of finance, investments and loans, statistical reasoning, probability, and risk assessment. Students who have completed MAT 800 will not receive credit for this course. This course is appropriate for non-STEM major students. This course is NOT intended for students planning on taking MAT 900 - College Algebra.

## 2. MAT 9AO, Algebra for STEM Majors

Prerequisite: For students who are eligible for a corequisite course per CUNY Math placement guidelines and likely to benefit from some developmental support, eligibility determined as follows (1) Score 40-56 on Elementary Algebra portion of the ACCUPLACER CUNY Assessment Test in Math, or (2) passed MAT M100, or (3) passed a Kingsborough workshop culminating in passing the Departmental MAT M100 final exam, or (4) Appropriate corequisite designation.

Corequisite: None
Pre/Co-requisite: None
Credits: 3 plus
Equated Credits: 5 equated credits
Hours: 8
Course Description: A comprehensive treatment of the following: real numbers, absolute value, integer and rational exponents, polynomial operations, factoring techniques, roots and radicals, linear and quadratic equations, graphing techniques, systems of linear equations, Gaussian elimination. Introduces the study of functions in preparation for the study of pre-calculus and calculus. Students who have completed MAT 900 will not receive credit for this course. This course is appropriate for STEM majors.
3. MAT 3000, Introduction to Mathematical Concepts in

Proof
Prerequisite: MAT 1400
Corequisite: None
Pre/Co-requisite: None
Credits: 1
Equated Credits: N/A
Hours: 2
Course Description: This course introduces majors in mathematics to the critical skill of reading and writing formal proofs; and serves as a bridge to the more advanced mathematics they will study at the baccalaureate level and beyond. Expected topics include: basic set theory, logic counting principles, direct proof, contrapositives, contradictions, non-conditionals, counterexamples, induction, relations, functions, and cardinality.

## Department of Physical Sciences

PSQ 1001 - Quantitative Skills for Physical Sciences I
PSQ 1002 - Quantitative Skills for Physical Sciences II
PSQ 1003 - Quantitative Skills for Physical Sciences III
PSQ 1004 - Quantitative Skills for Physical Sciences IV

Prerequisite: None
Corequisite: CHM11 Skills Proficient, PHY1100 Skills Proficient, PHY1300 Skills Proficient, PHY1400 Skills Proficient, EGR2200 Skills Proficient, or EGR2300 Skills Proficient determination. Contact Department of Physical Sciences for Skills Proficient information
Pre/Co-requisite: None
Credits: 0
Equated Credits: 1
Hours: 2hrs for 12 weeks for 3 modules of 4 weeks each
Course Description: Composed of co-requisite support modules in various basic math skills required in the physical sciences. This course is non crediting bearing and is not equivalent to any MAT course.

Skills Modules:

1. Basic skills of algebra required in the physical sciences.
2. Basic skills of geometry required in the physical sciences.
3. Basic skills of trigonometry required in the physical sciences.
4. Basic skills of vector products required in the physical sciences.
5. Basic skills of differential calculus required in the physical sciences.
6. Continuation of basic skills of differential calculus required in the physical sciences.
7. Basic skills of integral calculus required in the physical sciences.
8. Basic skills in series expansion required in the physical sciences.
9. Basic skills in linear algebra required in the physical sciences.
10. Basic skills in differential equations required in the physical sciences.

## COURSES FOR PATHWAYS APPROVAL

## Department of Behavioral Sciences and Human Services

1. PSY 4100, The Psychology of Immigration, Flexible Core: U.S. Experience in its Diversity (Group B)

Accepted, pending changed application

## Department of Mathematics and Computer Science

1. MAT 8AO, Math for Everyday, Required Core, Mathematical and Quantitative Reasoning (MQR)

## GENERAL EDUCATION LEARNING OUTCOMES

A student will:

1. Gather, interpret, and assess information from a variety of sources and points of view
2. Evaluate evidence and arguments critically or analytically
3. Produce well-reasoned written or oral arguments using evidence to support conclusions
4. Apply quantitative reasoning skills to solve problems
5. Demonstrate Knowledge of Human Cultures and the Physical and Natural World through the study of:

- World Cultures and Global Issues
- U.S. Experience in its Diversity
- Creative Expression
- Individual and Society
- Scientific World

6. Describe civic engagement and its importance in a global society

## FROM:

Introduction to Recreation

## FROM

TO:
Design Foundations

TO:
3-Dimensional Design

TO:
Typography

TO:
Prerequisite(s): RM 3100 or BF 3100. RM 3100 or BF 3100 Not required for Fashion Design Majors

TO:
Introduction to Recreation and Physical Education

TO:

Historical and philosophical foundations of recreation and leisure, study of institutions providing recreation services, and the socio-economic factors which influence the growth and development of recreation.

## 2. RPE 1200, Leadership in Recreation and Physical Education

## FROM:

Leadership in Recreation and Physical Education

## FROM:

Leadership, supervision, group dynamics, and proper teaching
techniques in leisure services. Additional topics include conflict resolution, behavior management, values and ethics, and risk management

## 3. RPE 1400, Outdoor Recreation

## FROM:

Outdoor Recreation

## FROM:

Trends in outdoor recreation, place of the recreation leader in outdoo programs, scope and extent of programs in conservation, camping, aquatics and nature. Weekend camping trip required.

[^0]Explore historical and philosophical foundations of recreation/recreation therapy and physical education and the study of the variety of organizations that provide those programs. Examine topics that include an analysis of play, games, sport and fitness as related to the development of personal interests among clients and students.

## TO:

Leadership in Recreation, Physical Education, and Sport Management

TO:

Learn various leadership styles, supervision, group dynamics, and proper teaching techniques. Additional topics include conflict resolution, behavior management, values and ethics, and risk management. Examines professional organizations in physical education teaching, recreation and recreation therapy, and sport management.

TO:
Camping and Outdoor Recreation

TO:

Explore trends in outdoor recreation, the role of the recreation leader, the scope and extent of programs in conservation, camping, and nature. A weekend 24 hour faculty supervised camping and hiking trip is required, as well as participation in two 4 hour training and preparation sessions, prior to camping outdoors. Small group work is organized to accomplish assignments. Individual journals and a final paper reflecting their experiences are required.

## FROM:

Methods of Teaching Fitness and Recreation Activities

## FROM:

Develop techniques, methods, skills and philosophy required to teach fitness and recreation activities.

Change: Course Title, Description and Prerequisite:
5. RPE 3200, Organization and Administration of Recreation Programs

## FROM:

Organization and Administration of Recreation Programs

## FROM:

Underlying principles for effective recreation programming, considers operation of recreation facilities, including budget, public relations, records, reports, equipment and evaluation.

## TO:

Introduction to Teaching Methods in Physical Education

TO:

Develop and execute a lesson plan for an activity, using the New York State Learning Standards for Physical Education, while receiving feedback from peers and instructor. Examine curriculum and instruction in physical education, the role and function of professional organizations, and develop a personal philosophy of physical education.

## TO:

Organization and Administration of Recreation, Physical Education, and Sport Management

TO:

Examine the principles of organization and administration of recreation, physical education, sport program and facilities. Focuses on developing effective programming inclusive of: a mission statement/goals/objectives, needs assessment, facility planning, program implementation and evaluation, learn effective communication, and address budget, public relations, risk management/safety, and personnel/supervision issues. Requirement to attend two college wide events and evaluate one as an operations manager.

TO:

Prerequisite(s): RPE 1100, RPE 1200, and RPE 3100. RPE 3100 Not required for Sports Management students

Prerequisite(s)/Corequisite(s): RPE 9152
6. RPE 9152, Field Experience in Physical Education, Recreation, and Recreation Therapy

## TO:

Field Experience in Physical Education, Recreation/Recreation Therapy, Sport Management

то:

Experience and complete 100 hours of supervised fieldwork in either a public or private school physical education program, community recreation setting, or therapeutic recreation program. A weekly one-hour seminar covers diversity, leadership, ethics and values, assessment, and development of resume/cover letter Works in small teams to develop, implement, and evaluate a student run activity. Maintain reflective logs of experiences throughout the semester.

TO:

Prerequisite(s): RPE 1100, RPE 1200, and RPE 3100. RPE 3100 Not required for Sports Management students

Prerequisite(s)/Corequisite(s): RPE 3200

## TO:

Learn principles of physical fitness. Complete a variety of fitness tests and create a personal fitness program including aerobic and anaerobic activities. Develop muscular strength and endurance; improve body composition, cardiovascular fitness, and flexibility. Learn the variety of tools/equipment to achieve physical fitness.

TO:
introduction to the principles and practices for assessing and improving cardiovascular fitness.
9. PEC 400 , Training with Weights

## FROM:

Study of weight training techniques to increase muscle strength and endurance in relation to various sports activities and to improve physical appearance.
10. PEC 1200, Tennis 3

## FROM:

Introduction to intermediate tennis skills: the lob, mid-court volley, flat and slice serves, ball spin, and use of offensive strategy in competition
11. PEC 1500, Badminton

FROM:

Basic skills play, knowledge of rules, offensive and defensive strategy
12. PEC 1900, Aerobic Dance

FROM:

A fitness program that combines vigorous calisthenics exercises with dance steps to music for improved cardiovascular endurance, muscles toning and flexibility.

Examine the principles and practices for assessing and improving cardiovascular fitness. Design a personal cardiovascular fitness program and receive individualized instruction. Learn to use proper progression to improve aerobic fitness

## то:

Learn weight training techniques to increase muscle strength and endurance for a specific sport activity and/or improve overall physical fitness. Learn proper progression and design a weight training program to suit personal needs.

TO:

Introduction to intermediate tennis skills: top spin, slice, attacking the net, offensive and defensive strategy in competition. Apply tennis skills in single and doubles game situations.

TO:

Learn to play badminton, knowledge of rules, and offensive and defensive strategy. Learn badminton skills: serving, underhand, backhand, overhead, drop shot, smash, and racquet grip. Learn singles and doubles game play

## то:

Learn vigorous calisthenics exercises with dance steps to music to improve cardiovascular endurance and muscle toning. Apply aerobic activities for health and wellness, boost mood, burn calories, and improve body composition and flexibility.

FROM:

How to conduct, plan and program social recreation activities in camps, centers, clubs, institutions and playgrounds. Under supervision, leadership is developed and performance evaluated.
14. RPE 3100, Therapeutic Recreation for Individuals with Disabilities I

## FROM:

The philosophy and history of Therapeutic Recreation (TR). The physical, social and psychological barriers to access as well as the principles of normalization and inclusion. An emphasis on the TR process and provision of a continuum of services based on clients' needs. Students learn how to adapt activities (e.g., aquatics, arts and crafts, dance) to meet the needs, interests and abilities of individuals with specific disabilities.
15. RPE 3500, Therapeutic Recreation for Individuals with Disabilities II

## FROM:

The biopsychosocial approach to understanding the later part of the lifespan and the contribution leisure and recreation make to quality of life. A continuum of services in a range of settings is examined. Students acquire an understanding of normal and abnormal psychological and emotional development. Students learn how to plan recreation programs to meet the needs of the elderly and those with emotional/psychological disorders.

Learn to assess, plan, implement, and evaluate an inclusive social recreation activity in camps, recreation centers, clubs, healthcare facilities, and playgrounds. Under supervision, opportunities are provided to develop leadership skills in recreation. Develop, implement, and evaluate an activity protocol. Learn special even planning, group dynamics, and effective teaching techniques.

## TO:

Learn the philosophy and history of Therapeutic Recreation (TR). Explore accessibility barriers as well as the principles of normalization and inclusion for individuals with special needs. An emphasis on the TR process and provision of a continuum of services based on clients' needs. Examine principles of adapting activities and environments to meet the needs, interests and abilities of individuals with physical and/or development disabilities. Attend one filed observation in a setting for individuals with special needs.

## TO:

Examine the biopsychosocial approach to the later part of the lifespan and the contribution leisure and recreation make to quality of life. Acquire an understanding of normal and abnormal psychological and emotional development. Learn to plan recreation programs that meet the needs of the seniors and those with emotional/psychological disorders in both clinical and community settings. Attend one clinical field observation.

## FROM:

Through clinical case simulations and analysis of videotaped interviews with patients, students will gain competency developing individualized treatment goals for patients. Practice in observation, reporting and writing various types of documentation, including parts of the MDS (Minimum Data Set) Plus and other assessments. Assessment as it applies to Long Term Care and Psychiatric populations will also be covered in the course.
17. RPE 4000, Sport and American Society

FROM:

The development of selected sports as well as related contemporary and controversial issues in America approached from a sociological point of view. Additional topics include economic and media influences, and future trends.
18. RPE 4600, Facilities Planning in Sports

## FROM:

The principles, guidelines and recommendations for planning, constructing, using and maintaining sports facilities.

## TO:

#### Abstract

Gain competency in using assessment tools in behavioral observation of clinical case simulations and analysis of video interviews with individuals that have special needs. Explore various Therapeutic Recreation models of practice for use in clinical and community based settings. Learn principles and practices of developing individualized treatment plans based on assessment data. Study methodology for completing an activity and developing a program protocol.

TO:

Explore the significant interrelationship of sport in American society and internationally. Apply sociological theories of functionalist, conflict, critical, and interactionist to study sport in society. Discuss contemporary and controversial issues inclusive of gender equity, drug use, youth sport, and race. Study the symbiotic relationship of sport, business, economy, and media.

## TO:

Learn principles, guidelines and recommendations for planning, constructing, using and maintaining sports facilities. Explore financing, public and private partnerships, Americans with Disabilities Act, and risk management in sport facilities. Study crowd and emergency management, facility alcohol plan, concession and box office operations.

## Department of Mathematics and Computer Science

## FROM:

This course enhances students' quantitative reasoning and mathematical skills useful in solving problems in mathematics and in other fields of study. Students learn to communicate solutions to mathematical problems in written and oral form. Topics include mathematical modeling, financial mathematics, units, percentages and statistical reasoning.

TO:

This course enhances students' quantitative reasoning and mathematical skills useful in solving problems in mathematics and in other fields of study. Students learn to communicate solutions to mathematical problems in written and oral form. Topics include mathematical modeling, financial mathematics, units, percentages and statistical reasoning. Students who have completed MAT 500 will not receive credit for this course. This course is intended for NonSTEM majors. This course is NOT intended for students planning on taking MAT 900 - College Algebra. TO:

Critical-thinking and mathematical skills useful in making informed decisions on many aspects of modern life involving quantitative concepts. Topics include logical analysis and inference, mathematics of finance, statistical reasoning and probability. Students who have completed MAT 8A0 will not receive credit for this course. This course is intended for Non-STEM majors. This course is NOT intended for students planning on taking MAT 900 - College Algebra.

TO:

A comprehensive treatment of the following: real numbers, absolute value, integer and rational exponents, polynomial operations, factoring techniques, roots and radicals, linear and quadratic equations, graphing techniques, systems of linear equations, and Gaussian elimination. Introduces the study of functions in preparation for the study of precalculus. Demonstration of proficiency in subject matter via departmental final exam is required for successful completion. Students who have completed MAT 9A0 will not receive credit for this course.

Change: Prerequisite and Course Description
4. MAT 500, Introduction to Mathematical Thought

## FROM:

This course emphasizes quantitative reasoning skills for informed citizens to understand the world around them. Topics include basic probability, data analysis, solution of elementary Algebraic equations, word problems and modeling data. This course is intended for Non-STEM majors. This course is NOT intended for students planning on taking MAT 900 College Algebra

## FROM:

Prerequisite(s): (1) Score of 40-56 on the Elementary Algebra portion of the ACCUPLACER CUNY Assessment Test in Math or (2) passed MAT M100 or (3) passed a Mathematics Department workshop culminating in passing the Departmental MAT M100 final exam

This course emphasizes quantitative reasoning skills for informed citizens to understand the world around them. Topics include basic probability, data analysis, solution of elementary Algebraic equations, word problems and modeling data. Students who have completed MAT 4A0 will not receive credit for this course. This course is intended for Non-STEM majors. This course is NOT intended for students planning on taking MAT 900-College Algebra

Prerequisite(s): For students who are eligible for a corequisite course per CUNY Math placement guidelines and likely to benefit from some developmental support, eligibility determined as follows: (1) Score of 40-56 on the Elementary Algebra portion of the ACCUPLACER CUNY Assessment Test in Math or (2) passed MAT M100 or (3) passed a Mathematics Department workshop culminating in passing the Departmental MAT M100 final exam or (4) Appropriate

TO:
Prerequisite(s): MAT 900 or MAT 9A0

TO:
Prerequisite(s): MAT 900 or MAT 9A0

## E. Strategic Planning Committee Report

The Strategic Planning Committee presents the following resolution:

WHEREAS, The Strategic Planning Committee, as part of a periodic review of the Kingsborough Community College Mission Statement, has gathered input from the College community and updated the Statement to reflect those ideas,
And WHEREAS, Based upon this input, the Committee has formulated an updated Vision Statement and a new Statement of Values,

BE IT THEREFORE RESOLVED, That the following will be the Kingsborough Community College Statements of Mission, Vision, and Values:

## MISSION STATEMENT:

Kingsborough Community College responds to the needs of its diverse community by offering high quality, affordable, innovative, student-centered programs of study that prepare graduates for transfer and the workforce. The college strives for equity and
seeks to provide each student with the appropriate resources and supports to foster success.

Institutional Learning Goals:
To earn a degree, students are expected to complete the general education requirements of CUNY's Pathways, as well as the course of study in a major discipline. Kingsborough aspires for all graduates to achieve the following institutional learning outcomes in the course of these studies:

1. Critical thinking: The student will identify, analyze, and solve problems in a variety of situations and areas of study.
2. Global perspective: The student will understand similarities and differences among diverse cultural and historical perspectives as well as individual civic responsibilities and democratic engagement.
3. Communication: The student will speak, read, write, and/or listen effectively.

## VISION:

Kingsborough Community College encourages students to take an active role in their own learning. The College strives for high quality and continuous improvement in all areas related to student learning, including academic programs, teaching, student services, administration and support, and the campus environment.

## VALUES:

Respect - Civility, acceptance, appreciation, and support of individual differences
Diversity - The proactive fostering of greater inclusion and ultimately equity at every level of college life

Integrity - Fair and ethical standards in all policies, procedures, and practices
Excellence - High quality teaching, student services, administration, and community engagement; and high standards for student achievement

Accountability - Taking responsibility for our actions and outcomes
Innovation - Creative thinking and approaches that enhance learning and support continuous improvement

## F. Instructional Committee Report

The Instructional Committee presents the following two resolutions:

1. Proposed resolution re: Adding Standardized Alphanumeric Grading Equivalences Language to the College Catalog

WHEREAS, currently there is no statement of the alphanumeric grading equivalences at Kingsborough Community College; and

WHEREAS, the Instructional Committee of the College Council believes that a statement of the alphanumeric grading equivalences at Kingsborough Community College would be beneficial to the students and the faculty in terms of uniform expectations and grading norms;

BE IT THEREFORE RESOLVED, that the following alphanumeric grading equivalencies be inserted into the college catalog, along with a statement about the grade of D - and a statement about exceptions concerning departments or programs for which external accreditation criteria determine alphanumeric grading equivalences:

The college interprets alphanumeric grading equivalences, with certain exceptions noted below, according to the following general guidelines:

Alpha/numeric equivalences:
A+ $\quad 97-100$
A 93-96
A- 90-92
B+ 87-89
B 83-86
B- 80-82
C+ 77-79
C $\quad 73-76$
C- 70-72
D+ 67-69
D $\quad 60-66$
F 0-59

It should be noted that the above alphanumeric equivalences apply to final course grades; instructors may choose to assign a D - grade to particular assignments, exams, or other elements of coursework, but the college does not permit the use of a D- grade for the final course grade.

Departments or programs with external accreditation criteria reserve the option of publishing department- or program-specific guidelines. Additionally, individual instructors reserve the option of publishing course-specific guidelines.
2. Proposed resolution re: Adding Explanatory Language regarding the Grade of C- to the Catalog

WHEREAS, currently there is no statement in the college catalog explaining the placement of the grade of C - alongside grades in the D range;
WHEREAS, the Instructional Committee of the College Council believes the placement of C-grade is explained by the fact that C-grades do not transfer out and that students earning grades of C- will likely need to retake those courses when they transfer out; and
WHEREAS, the Instructional Committee of the College Council believes that adding a statement explaining the placement of the grade of C- alongside grades in the D range would be beneficial to the students and the faculty in terms of uniform expectations and grading norms;

BE IT THEREFORE RESOLVED, that the following explanatory statement be inserted into the college catalog, just after the statement which reads:

A course in which a grade of "C-" or below was earned may be repeated only if a more advanced course in that discipline has not been completed. Students who earn a "C" grade or better in any course offered at the college MAY NOT REPEAT that course.
(http://catalog.kingsborough.edu/content.php?catoid=4\&navoid=257\#grades)

The explanatory statement should read as follows:
The grade of C - is placed alongside grades in the D range to alert students to the fact that while C - is a passing grade, courses in which students earn the grade of C typically do not transfer, and students typically need to retake these courses upon transfer to the another institution.

## III. New Business

## Meeting II: First meeting of the 2019-2020 College Council

A. The Council will nominate and elect one faculty or staff member to the Committee on Committees (seat currently held by Prof. Anna Rozenboym).
B. The Council will nominate and elect up to three Student members to the Committee on Committees
C. The Committee on Committees will meet to (a) select officers, and (b) to confirm the standing committee assignments for new Council members
D. The membership of the individual standing committees will be announced, and each standing committee will meet very briefly to elect its officers for the 20192020 academic year.

Members of the Committee on Committees, and date their terms expire:
Prof. Rick Repetti ........................... 2020
Prof. Michael Barnhart .................. 2020
Ms. Judy Cohen ............................. 2020
Prof. Michael Sokolow .................. 2020
Prof. Katia Perea ............................. 2020
Prof. Don Hume .............................. 2021
